

GROUNDWAVE

Vol. 5, No. 5

VE3RC

April 1955

MEETING

Time: Wednesday April 6, 1955, at 2015 hrs.
Place: St. Patrick's College, Echo Drive, Room 208.
Program:

Films and discussion on:
R.F. Amplifiers and
VHF Oscillators.

The film will be a lead-off for a discussion period afterward, with some authoritative types on hand to answer the difficult questions.

Auction

It was the biggest we can recall. The great piles of stuff didn't take long going and there were some real bargains. Almost everything was sold and some things were given away.

BANQUET

Friday April 15 is the date. An interesting program for the evening is planned. After the usual turkey dinner there will be some door prizes and dancing - both square and round - until the wee hours. Tickets are in the hands of the ticket sellers who will try to fone you (if you are a member) and get tickets to you in good time. The tickets are \$1.50 each. Make sure that you have yours early.

ADS

For Sale: 80 thru 10, 5-band, double conversion receiver; 8 xtal lattice network in the IF; phasing control, BFO, noise limiter, xtal calibrator, separate front ends for each band, complete with 20 tubes and power supply, \$49.95. - Jim Swail, VE3KF, SH6-1437.

For Sale: Williamson Amplifier, Partridge output transformer, tubes etc., \$69.95 - Jim Swail, VE3KF, SH6-1437

LICENCES

Yes they are due this month. But that's not the point. At the next meeting we hope to form the first group in a concerted effort in self advancement for class-A licencing. This was mentioned at the last meeting and the response indicated that there was sufficient interest. A study course has been laid out and people have volunteered to be advisors. The number will have to be limited but it is hoped that other groups will follow. A copy of the ARRL Licence manual will be the first thing required. Arm yourself with one and come along.

May Meeting

A rig-building contest is planned at the meeting. Better do some reading between now and then. A list of materials and the complete rules will be published in the May GROUNDWAVE.

GROUNDWAVE is published by the Ottawa Amateur Radio Club, monthly when possible, P.O. Box 204, Ottawa, Ont.

President: Wally Johnstone, VE3LX., 2-5273.
V.-Pres: Norm Jordan, VE3BR, 2-7833
