An enjoyable and informative film on Standing Waves from B.T. Co. was screened. It demonstrated mechanical and electrical analogies to some of our problems. Ken Watkins, VE3CAL, gave a compact resumé of Delta, Gamma and Omega matching and explained in detail what he did to load his tower. Refer to QST, June 1960, p 32 and Oct. 63, p 45 for more info. Very well done Ken.

AUCTION #2

This was a complete success in several ways. There was not quite so much stuff to go thru and we didnt do so much business, but we cleared the floor with 15 minutes to spare. All sellers may collect their loot at the 2 Dec. Meeting. This is the last auction this season and Auctioneers Steve Chisholm, Bill McLaughlin and Mailes Dier are to be congratulated on a FB job.
